#### **IN THE CLAIMS:**

Please delete claims 13 and 22.

In claim 12 please amend to read the following:

*12*  
--A method for treating a crystal having nonlinear optical properties and including foreign atoms which bring about specific absorption of incoming light, the method comprising: converting the foreign atoms in the crystal to a lower valency state by an oxidation process, thereby liberating electrons; removing, during the oxidation process, the liberated electrons from the crystal using an external current source so as to reduce an optical absorption value of the
